Improvements and fixes. There is no other app for reading old, obscure works (free in most cases), but Google Play. With his help I read Joseph Priestley's Disvision related to matter and spirit, and I part through his Corruption of Christianity. Also, George Berkeley Alciphron. Now I've moved on to Sir Humphrey Davy Elements of Chemical Philosophy, books that no one in their mind would waste time on but still have so much fun. This is only complemented by the ability to highlight in five colors and make your own footnotes. You can identify most of the words in the text, or search for them online. I highly recommend this for any fan of dead authors. I found this app great, there are still many things to improve to make it better. The great thing is that it has the best 3D flipping garment while turning pages and it also syncs the book to its drive, it can read both pdf and epub although it would be better if it could read azw3, djvu, mobi, etc. that would also be better if I could put on some notes in it as well, it has some issues To fix yet, I turn on the voice for the book it shuts down when moving to another page simply he was only able to read the page at a time. I can't edit the highlights I previously did to edit these highlights I have to remove the entire selected highlight and have to be done again. To make this app better if the user can make folders for individual different files. It would be great and I would be so grateful if the above issues and features would be updated. Thank you for listening to me. As an app reader it does the job solidly! I can easily read any book I purchased through Google however abilities The app is in dire need. I don't want to view articles as much as I want to look for more books, I might find interest. When you open the app there is a decent recommended list for you, but without any way to change Expand the list, search for a new list or simply update the list without going through to build your interest type form. Obviously I can browse on my desktop or laptop, but it's not as convenient as being able to do it with the same device I just finished reading with. It's pretty frustrating to constantly have to unlock your phone because the screen folds itself on each page. Developer of the website App Privacy Support policy Una Chica corriente de Oregon.
